SUMMARY

Motivated and adaptable Information Technology student at Macquarie University with strong problem-solving, communication, and teamwork skills. Willing to learn and adapt to different environments. Experienced in collaborative projects, client-based work, and using technology to create practical solutions. Eager to apply technical knowledge, learn continuously, and contribute positively in a professional IT environment.

SKILLS

DESIGN - Figma, Canva, Procreate, UI/UX Design, Wireframing, Prototyping, Visual Design

TECHNICAL - Java, C, HTML, CSS, JavaScript, Processing, GitHub, Jira, Confluence

SOFT SKILLS - Teamwork, Communication, Time Management, Creativity, Problem Solving, Adaptability, Client Communication

EXPERIENCE

NCP (NEW COLOMBO PLAN) INTERNSHIP PROGRAM

Macquarie University

(Indonesia, November 2025 - December 2025)

- Collaborated with a real client to design a mobile app and website prototype for a radio station.
- Used Figma to create wireframes and interactive prototypes based on client and user needs.
- Presented design ideas, received feedback, and refined solutions throughout the project.
- Developed teamwork, communication, and problem-solving skills in an international setting.

SOCIAL MEDIA POST DESIGNER

PPIA, Macquarie University

(February 2025 - February 2026)

- Designed social media content for different events while maintaining a consistent visual theme and style.
- Created engaging and creative posts tailored to the purpose, tone, and audience of each event.
- Used Canva and Procreate to produce layouts, graphics, and custom visual elements.

CARER (CASUAL)

for child with autism

(Sydney, September 2024 - Present)

- Cared for a child with autism, creating a safe and supportive environment.
- Planned fun activities based on the child's interests to help with their growth.
- Worked with parents to set daily routines and address specific needs.

PROJECT

RADIO STATION APP AND WEBSITE PROTOTYPE

Bharabas

(Indonesia, November 2025 - December 2025)

- Led UI design for a full website prototype in Figma covering desktop and mobile breakpoints, with a reusable component library and consistent visual language throughout.
- Translated client-defined UX flows into polished, dev-ready screens; presented designs to stakeholders and incorporated feedback across multiple iterations.

CASHFLO - PERSONAL FINANCE JAVA APPLICATION

(Sydney, September 2025 - November 2025)

- Developed a Java-based budgeting and finance tracking application.
- Worked on features such as transactions, categories, balance tracking, and data handling.
- Improved programming, debugging, and problem-solving skills through iterative development.

EDUCATION
