PROFILE

Software Technology student at Macquarie University, building frontend web applications with JavaScript, LitElement, and REST APIs

Hands-on experience across the SDLC, including Java application development, Agile/Scrum practice, and iterative testing

Complements development work with UI/UX design skills in Figma, giving a practical understanding of user-facing product decisions

Delivered a client-facing prototype internationally through the New Colombo Plan program with Bharabas Radio

EDUCATION

Macquarie University <i>Bachelor of Information Technology (Software Technology)</i>	July 2025 – June 2027 Sydney, Australia
Macquarie University College <i>Diploma of Business Analytics</i>	Sept. 2024 – July 2025 Sydney, Australia

EXPERIENCE

Bharabas Radio (New Colombo Plan Program) <i>UI/UX Design & Software Development Intern</i>	Nov. 2025 – Dec. 2025 Indonesia
- Collaborated in an Agile/Scrum team to design and prototype a cross-platform news and radio application for a real-world client - Conducted user research through surveys and usability testing to validate design decisions - Designed responsive wireframes and high-fidelity prototypes in Figma for desktop and mobile platforms - Worked with stakeholders to refine features and presented the final solution through multiple Agile design iterations	
PPIA, Macquarie University <i>Social Media Designer</i>	Feb. 2025 – Feb. 2026 Sydney, Australia
- Designed promotional graphics and social media content using Canva and Procreate for university events - Maintained a consistent visual identity while creating engaging content for different audiences	
Private Family <i>Casual Carer</i>	Sept. 2024 – Present Sydney, Australia
- Provided compassionate care by creating structured routines and engaging developmental activities - Worked closely with parents to support daily routines and individual care needs	

PROJECTS

Personal Portfolio Website	2025 – Present
- Developed a responsive portfolio website from scratch using HTML, CSS, and JavaScript with no external frameworks - Structured modular, reusable UI components and managed state and interaction logic through vanilla JavaScript and DOM manipulation - Built a custom animation system using z-index layering, CSS transitions, and JavaScript to manage state changes across screens - Implemented per-frame JavaScript animations and responsive units (clamp(), rem, vw) for consistent scaling across devices	
Book Recommendation Web App	2025
- Developed a reusable LitElement web application integrated with the OpenLibrary REST API - Implemented genre filtering, search, saved books, and localStorage-based functionality - Resolved lazy-loading data fetching and CSS overflow issues to improve performance and layout stability - Designed a modular, reusable component architecture following LitElement best practices	

SKILLS

Languages: Java, JavaScript, C, HTML5, CSS3

Frontend: Responsive Design, CSS Grid, Flexbox, DOM Manipulation, REST APIs, LitElement

Tools: Git, GitHub, Figma, Jira, Confluence, Canva, Procreate

Concepts: Object-Oriented Programming, Agile, Scrum, UI/UX Design, Wireframing, Prototyping
